Skills

- Python
- PyTorch
- MLflow
- Kubernetes
- SQL
- scikit-learn
- Pandas
- Hugging Face
- Docker
- Feature Stores

Languages

English · Hindi

Certifications

- Deep Learning Specialization
- AWS ML Specialty

Summary

David is a Machine Learning Engineer with 5 years of experience shipping production systems. Strong hands-on background with Python, PyTorch, MLflow, Kubernetes, collaborating across product and engineering. Interested in roles with technical ownership and measurable impact in San Francisco, USA.

Experience

ML Engineer — AI Ventures (2020 – Present · San Francisco, USA)

- Deployed recommendation models serving 1M users
- Built feature store in Python
- Documented technical decisions and runbooks for the team
- Cut delivery time by automating workflows with Python

Data Scientist — NovaLabs (2017 – 2019 · San Francisco, USA)

- Partnered with product to ship incremental value using Python
- Improved code quality through reviews and automated tests
- Documented technical decisions and runbooks for the team
- Cut delivery time by automating workflows with Python

Research Intern — BrightStack (2013 – 2016 · San Francisco, USA)

- Partnered with product to ship incremental value using Python
- Improved code quality through reviews and automated tests
- Documented technical decisions and runbooks for the team
- Cut delivery time by automating workflows with Python

Projects

Internal reporting toolkit — Lightweight ETL and dashboard built with Python for team metrics.

Open-source side project — Maintained a small utility library focused on Python patterns.

Education

MSc Artificial Intelligence — Stanford University (2019)

Capstone project with distinction; coursework in systems and data.

Professional specialization course — Online platform (Coursera / edX) (2020)

Continuing education aligned with current stack.
