

Ivan Petrov

Rust Systems Programmer

ivan.petrov@demo-cvs.local · +1 (555) 8877-1268 · Prague, Czech Republic · linkedin.com/in/ivan-petrov

Summary

Ivan is a Rust Systems Programmer with 7 years of experience shipping production systems. Strong hands-on background with Rust, C++, Linux, Networking, collaborating across product and engineering. Interested in roles with technical ownership and measurable impact in Prague, Czech Republic.

Experience

Systems Programmer — PerfSystems (2018 – Present · Prague, Czech Republic)

- Built high-throughput proxy in Rust
- Optimized latency-critical paths
- Documented technical decisions and runbooks for the team
- Cut delivery time by automating workflows with Rust

C++ Engineer — NovaLabs (2015 – 2017 · Prague, Czech Republic)

- Partnered with product to ship incremental value using Rust
- Improved code quality through reviews and automated tests
- Documented technical decisions and runbooks for the team
- Cut delivery time by automating workflows with Rust

Systems Intern — BrightStack (2011 – 2014 · Prague, Czech Republic)

- Partnered with product to ship incremental value using Rust
- Improved code quality through reviews and automated tests
- Documented technical decisions and runbooks for the team
- Cut delivery time by automating workflows with Rust

Projects

Internal reporting toolkit — Lightweight ETL and dashboard built with Rust for team metrics.

Open-source side project — Maintained a small utility library focused on Rust patterns.

Education

MSc Computer Science — Charles University (2017)

Capstone project with distinction; coursework in systems and data.

Professional specialization course — Online platform (Coursera / edX) (2018)

Continuing education aligned with current stack.

Skills

Rust · C++ · Linux · Networking · WASM · Tokio · Performance · Systems Design · Git · CI/CD

Certifications

AWS Cloud Practitioner
