

Alex Thompson

Game Developer
alex.thompson@demo-cvs.local · +1 (555) 3829-0547 · Montreal, Canada · linkedin.com/in/alex-thompson

Summary

Results-driven Game Developer with 5 years of experience building and shipping high-performance production systems. Expert in Unity, C#, and technical pipeline optimization with a proven track record of collaborating across cross-functional teams. Passionate about driving technical ownership and delivering measurable impact in the Montreal gaming industry.

Experience

Game Developer — Indie Games MTL (2019 – Present · Montreal, Canada)

- Engineered and launched 2 mobile titles, successfully scaling to over 100K downloads through iterative design.
- Refactored the rendering pipeline using Shader Graph to improve visual fidelity while maintaining strict performance budgets.
- Authored comprehensive technical documentation and operational runbooks to streamline onboarding and knowledge sharing.
- Accelerated development cycles by 20% through the implementation of custom CI/CD pipelines and automated Unity build workflows.

Gameplay Programmer — NovaLabs (2016 – 2018 · Montreal, Canada)

- Collaborated with product stakeholders to translate design requirements into functional gameplay features using C#.
- Enforced high engineering standards by conducting rigorous code reviews and integrating automated testing suites.
- Standardized technical decision-making processes by creating centralized documentation and team-wide architectural guidelines.
- Optimized internal development velocity by automating repetitive asset management tasks within the Unity environment.

Junior Developer — BrightStack (2012 – 2015 · Montreal, Canada)

- Contributed to the development of core gameplay mechanics and UI systems using Unity and UI Toolkit.
- Participated in peer code reviews to identify bugs early and ensure consistent application of coding best practices.
- Maintained technical project logs and documentation to support long-term project sustainability.
- Streamlined build and deployment processes by leveraging Git-based automation tools to reduce manual overhead.

Projects

Internal reporting toolkit — Developed a lightweight ETL and dashboard system in Unity to visualize team performance metrics and project health.

Open-source side project — Maintained an open-source utility library focused on modular Unity design patterns and reusable code components.

Education

Diploma Game Development — Vanier College (2018)

Earned a Diploma in Game Development with distinction, focusing on complex systems architecture and data structures.

BSc Data Science — University of Helsinki (2014)

Undergraduate studies at University of Helsinki, foundational degree before Diploma Game Development.

Skills

Unity · C# · Game Design · Blender · Shader Graph · Mobile · Profiling · Git · CI/CD · UI Toolkit
