

Ivan Petrov

Rust Systems Programmer

ivan.petrov@demo-cvs.local · +1 (555) 8877-1268 · Prague, Czech Republic · linkedin.com/in/ivan-petrov

Summary

Ivan Petrov is a Rust Systems Programmer with 7 years of experience architecting high-performance production systems. He specializes in Rust, C++, and Linux, with a proven track record of optimizing low-latency networking and streamlining CI/CD pipelines. He is seeking roles that offer technical ownership and the opportunity to drive measurable engineering impact.

Experience

Systems Programmer — PerfSystems (2018 – Present · Prague, Czech Republic)

- Engineered a high-throughput network proxy using Rust and Tokio, significantly increasing request handling capacity.
- Refactored latency-critical code paths to reduce system overhead and improve overall throughput.
- Authored comprehensive technical documentation and operational runbooks to standardize team maintenance procedures.
- Accelerated deployment cycles by implementing custom Rust-based automation tools within the CI/CD pipeline.

C++ Engineer — NovaLabs (2015 – 2017 · Prague, Czech Republic)

- Collaborated with product stakeholders to integrate Rust components into existing C++ systems, delivering incremental feature value.
- Enforced rigorous code quality standards through detailed peer reviews and the implementation of automated testing suites.
- Maintained internal technical documentation to ensure knowledge continuity across cross-functional engineering teams.
- Streamlined development workflows by building internal automation scripts, resulting in faster release iterations.

Systems Intern — BrightStack (2011 – 2014 · Prague, Czech Republic)

- Assisted in the development of core system features by applying Rust programming best practices.
- Contributed to the stability of the codebase through active participation in code reviews and unit testing.
- Drafted technical documentation for system modules to support team onboarding and project clarity.
- Automated repetitive manual tasks using Rust, reducing time-to-delivery for internal project milestones.

Projects

Internal reporting toolkit — Developed a lightweight ETL pipeline and dashboard in Rust to visualize and track team performance metrics.

Open-source side project — Maintained an open-source utility library dedicated to demonstrating idiomatic Rust design patterns.

Education

MSc Computer Science — Charles University (2017)

Earned an MSc in Computer Science with a distinction-awarded capstone project focused on systems architecture.

BSc Software Engineering — TU Delft (2013)

Undergraduate studies at TU Delft, foundational degree before MSc Computer Science.

Skills

Rust · C++ · Linux · Networking · WASM · Tokio · Performance · Systems Design · Git · CI/CD
