

Marcus Chen

DevOps Engineer

marcus.chen@demo-cvs.local · +1 (555) 5764-6537 · Berlin, Germany · linkedin.com/in/marcus-chen

Summary

Marcus is a DevOps Engineer with 4 years of experience architecting and scaling production-grade infrastructure. He specializes in optimizing CI/CD pipelines and cloud-native environments using Kubernetes, Terraform, and AWS to drive measurable operational efficiency.

Experience

DevOps Engineer — CloudNine (2018 – Present · Berlin, Germany)

- Orchestrated EKS clusters supporting 50+ microservices, ensuring high availability and seamless scaling.
- Optimized CI/CD pipelines to reduce deployment lead times by 60% through strategic automation.
- Standardized infrastructure operations by authoring comprehensive technical runbooks and architectural decision records.
- Accelerated software delivery cycles by implementing Helm charts and automated Kubernetes workflows.

SysAdmin — NovaLabs (2015 – 2017 · Berlin, Germany)

- Collaborated with cross-functional product teams to deploy incremental features within a containerized Kubernetes environment.
- Elevated codebase reliability by establishing rigorous peer review processes and integrating automated testing suites.
- Maintained system stability by documenting critical infrastructure configurations and incident response procedures.
- Streamlined development operations by automating repetitive deployment tasks using Linux-based scripting.

Junior DevOps — BrightStack (2011 – 2014 · Berlin, Germany)

- Supported product development lifecycles by managing containerized environments and Kubernetes cluster resources.
- Enhanced software quality by participating in code reviews and implementing automated unit testing frameworks.
- Contributed to team knowledge sharing by documenting system architecture and operational best practices.
- Improved deployment velocity by automating manual configuration workflows within the development pipeline.

Projects

Internal reporting toolkit — Developed a lightweight ETL pipeline and monitoring dashboard using Kubernetes to visualize team performance metrics.

Open-source side project — Maintained an open-source utility library focused on simplifying complex Kubernetes deployment patterns.

Education

BSc Information Systems — MIT (2017)

Earned a BSc in Information Systems from MIT in 2017, graduating with distinction on a capstone project.

BSc Computer Science — University of Toronto (2013)

Undergraduate studies at University of Toronto, foundational degree before BSc Information Systems.

Skills

Kubernetes · Terraform · Go · AWS · Prometheus · Grafana · Helm · Linux · CI/CD · Python

Certifications

CKA (Certified Kubernetes Administrator) · HashiCorp Terraform Associate

Languages

English · Mandarin
