

Oliver Brown

Security Engineer

oliver.brown@demo-cvs.local · +1 (555) 3071-1867 · Edinburgh, UK · [linkedin.com/in/oliver-brown](#)

Summary

Security Engineer with 9 years of experience designing and securing production-grade systems. Expert in leveraging Python, OWASP standards, and threat modeling to drive technical ownership and measurable security improvements. Proven track record of collaborating across engineering teams to integrate robust security practices into the SDLC.

Experience

Security Engineer — SecureNet (2017 – Present · Edinburgh, UK)

- Led comprehensive security audits for high-stakes fintech clients, identifying and mitigating critical vulnerabilities.
- Engineered custom Python-based automation tools to streamline vulnerability scanning and reduce manual overhead.
- Authored technical runbooks and architectural documentation to standardize incident response and security protocols.
- Optimized security workflows by integrating automated tooling, resulting in a significant reduction in deployment lead times.

IT Security Analyst — NovaLabs (2014 – 2016 · Edinburgh, UK)

- Collaborated with product teams to embed Security best practices directly into the development lifecycle.
- Enhanced codebase integrity by implementing rigorous security-focused code reviews and automated testing suites.
- Developed internal knowledge bases and technical documentation to improve team-wide security awareness.
- Automated repetitive security tasks using Python, accelerating delivery cycles while maintaining high compliance standards.

SOC Analyst — BrightStack (2010 – 2013 · Edinburgh, UK)

- Monitored network traffic and system logs to identify potential threats and maintain organizational security posture.
- Refined incident response procedures through detailed analysis and documentation of security events.
- Supported cross-functional teams by providing actionable security insights and technical guidance.
- Streamlined operational workflows by automating routine security checks and reporting processes.

Projects

Internal reporting toolkit — Developed a lightweight ETL pipeline and dashboard using Security principles to visualize team performance metrics.

Open-source side project — Maintained an open-source utility library dedicated to implementing standardized Security patterns.

Education

MSc Cybersecurity — University of Edinburgh (2016)

Completed an MSc in Cybersecurity at the University of Edinburgh with a distinction-level capstone project.

BSc Computing — Imperial College London (2012)

Undergraduate studies at Imperial College London, foundational degree before MSc Cybersecurity.

Skills

Security · OWASP · Python · Burp Suite · SIEM · Threat Modeling · Secure SDLC · Linux · Cloud Security · IAM

Certifications

CompTIA Security+ · OSCP (in progress)
