

Chris Evans

Database Administrator

chris.evans@demo-cvs.local · +1 (555) 4541-4934 · Boston, USA · linkedin.com/in/chris-evans

Summary

Database Administrator with 5 years of experience architecting and maintaining high-availability production systems. Expert in PostgreSQL performance tuning, Linux infrastructure, and automation, with a proven track record of driving operational efficiency through robust backup and replication strategies.

Experience

Database Administrator — DataCore Systems (2014 – Present · Boston, USA)

- Oversee the lifecycle and health of 50+ PostgreSQL instances, ensuring 99.9% uptime and data integrity.
- Architected and deployed streaming replication clusters to enhance fault tolerance and read scalability.
- Standardized operational excellence by authoring comprehensive technical runbooks and architectural decision records.
- Accelerated deployment cycles by engineering Python and Shell-based automation for routine database maintenance tasks.

SQL Developer — NovaLabs (2011 – 2013 · Boston, USA)

- Collaborated with cross-functional product teams to deliver scalable database schemas and incremental feature updates.
- Elevated codebase reliability by implementing rigorous peer review processes and automated SQL testing suites.
- Formalized internal knowledge bases by documenting complex migration strategies and troubleshooting protocols.
- Optimized development workflows by automating repetitive PostgreSQL configuration and schema deployment tasks.

Junior DBA — BrightStack (2007 – 2010 · Boston, USA)

- Supported core product initiatives by assisting in the design and maintenance of PostgreSQL database environments.
- Contributed to the development of automated testing frameworks to ensure high-quality SQL code delivery.
- Maintained detailed technical documentation to support team-wide database administration and incident response.
- Streamlined database management processes by developing scripts to automate routine PostgreSQL administrative workflows.

Projects

Internal reporting toolkit — Developed a lightweight ETL pipeline and visualization dashboard using PostgreSQL to track and report team performance metrics.

Open-source side project — Maintained an open-source utility library designed to simplify and standardize common PostgreSQL design patterns.

Education

BSc Information Systems — Boston University (2013)

Earned a BSc in Information Systems from Boston University in 2013, focusing on systems architecture and data management.

Professional specialization course — Online platform (Coursera / edX) (2014)

Completed a professional specialization course via online platforms in 2014 to advance technical proficiency in modern database stacks.

Skills

PostgreSQL · SQL · Linux · Backup · Replication · Performance Tuning · HA · Monitoring · Python · Shell

Certifications

PostgreSQL Professional · AWS Database Specialty
