Skills

- Python
- PyTorch
- MLflow
- Kubernetes
- SQL
- scikit-learn
- Pandas
- Hugging Face
- Docker
- Feature Stores

Languages

English · Hindi

Certifications

- Deep Learning Specialization
- AWS ML Specialty

Summary

Machine Learning Engineer with 5 years of experience architecting and deploying scalable production systems. Proven expertise in PyTorch, Kubernetes, and MLflow, with a focus on driving measurable business impact through end-to-end model lifecycle management.

Experience

ML Engineer — AI Ventures (2020 – Present · San Francisco, USA)

- Engineered and deployed high-throughput recommendation models serving over 1M active users.
- Architected a robust feature store using Python to streamline data retrieval for real-time inference.
- Standardized engineering practices by authoring comprehensive technical runbooks and architectural decision records.
- Optimized CI/CD pipelines with Python-based automation, reducing model deployment lead times by 30%.

Data Scientist — NovaLabs (2017 – 2019 · San Francisco, USA)

- Collaborated with product stakeholders to translate business requirements into high-impact Python data solutions.
- Enforced rigorous code quality standards through peer reviews and the implementation of automated testing suites.
- Developed internal documentation and knowledge-sharing resources to improve team onboarding and system transparency.
- Streamlined development workflows by automating repetitive data processing tasks, significantly increasing team velocity.

Research Intern — BrightStack (2013 – 2016 · San Francisco, USA)

- Contributed to cross-functional product initiatives by developing data-driven features using Python.
- Refactored legacy codebases to improve maintainability and integrated automated testing to ensure system reliability.
- Maintained detailed technical documentation to support research reproducibility and team collaboration.
- Automated manual data extraction workflows, resulting in faster turnaround times for research deliverables.

Projects

Internal reporting toolkit — Developed a lightweight ETL pipeline and interactive dashboard using Python to track and visualize key team performance metrics.

Open-source side project — Maintained an open-source utility library focused on optimizing Python design patterns and developer productivity.

Education

MSc Artificial Intelligence — Stanford University (2019)

Completed MSc in Artificial Intelligence with a distinction-awarded capstone project and advanced coursework in systems and data.

Professional specialization course — Online platform (Coursera / edX) (2020)

Engaged in professional specialization coursework to maintain technical proficiency with modern industry-standard tools.
