

Ryan Patel

Python Developer

ryan.patel@demo-cvs.local · +1 (555) 3774-9110 · Toronto, Canada · [linkedin.com/in/ryan-patel](https://www.linkedin.com/in/ryan-patel)

Summary

Accomplished Python Developer with 10 years of experience architecting and scaling production-grade systems. Proven expertise in Django, Celery, and Redis, with a focus on driving technical ownership and measurable operational efficiency. Based in Toronto, Canada, seeking to leverage deep backend proficiency to deliver high-impact software solutions.

Experience

Python Developer — AutoScript Inc (2019 – Present · Toronto, Canada)

- Engineered high-throughput reporting pipelines using Python, reducing manual data processing time by 40%.
- Developed and maintained scalable internal administrative tools leveraging the Django framework.
- Standardized engineering practices by authoring comprehensive technical documentation and operational runbooks.
- Optimized CI/CD workflows through custom Python automation, accelerating feature delivery cycles.

Backend Developer — NovaLabs (2016 – 2018 · Toronto, Canada)

- Collaborated with cross-functional product teams to deploy incremental backend features using Python.
- Enforced rigorous code quality standards through peer reviews and the implementation of automated testing suites.
- Architected system documentation and troubleshooting guides to streamline team onboarding and maintenance.
- Refactored legacy scripts into modular Python services, significantly reducing deployment bottlenecks.

Intern — BrightStack (2012 – 2015 · Toronto, Canada)

- Assisted in the development of core product features by contributing clean, maintainable Python code.
- Supported the QA lifecycle by writing and executing automated test cases to ensure system stability.
- Contributed to technical knowledge bases by documenting system architecture and internal development processes.
- Streamlined repetitive development tasks by creating Bash and Python-based automation utilities.

Projects

Internal reporting toolkit — Designed a lightweight ETL pipeline and dashboard using Python to visualize real-time team performance metrics.

Open-source side project — Maintained an open-source utility library dedicated to implementing efficient Python design patterns.

Education

BSc Computer Science — University of Toronto (2018)

Earned a BSc in Computer Science with a focus on systems architecture and data structures.

Professional specialization course — Online platform (Coursera / edX) (2019)

Completed professional specialization coursework to stay current with modern backend development stacks.

Skills

Python · Django · Celery · Redis · Linux · FastAPI · PostgreSQL · pytest · Docker · Bash

Certifications

AWS Cloud Practitioner
