

Sarah Mitchell

Engineering Manager
sarah.mitchell@demo-cvs.local · +1 (555) 6058-8008 · New York, USA · linkedin.com/in/sarah-mitchell

Summary

Engineering Manager with 9 years of experience building and scaling high-performance production systems. Proven track record in technical leadership, Python architecture, and cross-functional stakeholder management to drive measurable business outcomes. Passionate about fostering engineering excellence and building high-impact teams in New York.

Experience

Engineering Manager — ScaleUp NYC (2019 – Present · New York, USA)

- Lead and mentor a high-performing team of 12 Python engineers, fostering a culture of technical excellence and professional growth.
- Architected and scaled a core platform infrastructure supporting over 10M active users with high availability.
- Standardized engineering practices by authoring comprehensive technical runbooks and architectural decision records.
- Optimized development lifecycles by implementing automated workflows, resulting in a significant reduction in feature delivery time.

Tech Lead — NovaLabs (2016 – 2018 · New York, USA)

- Collaborated directly with product stakeholders to define roadmaps and deliver incremental value through iterative development.
- Elevated codebase reliability by establishing rigorous code review standards and expanding automated test coverage.
- Formalized team knowledge sharing through the creation of centralized technical documentation and operational playbooks.
- Streamlined deployment pipelines by automating manual processes, increasing overall team velocity.

Senior Engineer — BrightStack (2012 – 2015 · New York, USA)

- Drove technical strategy and execution for key product features, aligning engineering efforts with business objectives.
- Championed quality-first development by implementing automated testing frameworks and peer-review protocols.
- Developed internal technical documentation to streamline onboarding and system maintenance for the engineering team.
- Enhanced operational efficiency by automating repetitive development tasks and refining team workflows.

Projects

Internal reporting toolkit — Developed a lightweight ETL pipeline and visualization dashboard to track team performance metrics and operational health.

Open-source side project — Maintained an open-source utility library, focusing on implementing scalable design patterns and robust code architecture.

Education

MSc Computer Science — Columbia University (2012)

Completed an MSc in Computer Science with a focus on systems and data, graduating with a distinction for the capstone project.

Professional specialization course — Online platform (Coursera / edX) (2013)

Engaged in professional specialization coursework to maintain technical proficiency with modern industry stacks.
